Integrated Reporting 2023

Summary

1. Introduction	. 3
2. Organizational boundaries and exceptions in the scope of the Report	. 3
3. Accounting Information, Currencies and Conversions	. 4
4. Reporting system	4
5. Details of reporting criteria	5
6. Table of criteria and indicators	. 5

1. Introduction

This document is the basis for the preparation of the 2023 YDUQS Participações S.A. Integrated Report, with the objective of facilitating the understanding of the limitations and assumptions adopted during the preparation of the report, as well as ensuring that it adheres to the criteria necessary for the information assurance stage. YDUQS Participações S.A. owns the higher education brands Estácio, IBMEC, Damásio, IDOMED, HardWork Medicina, Qconcursos and Wyden, being one of the largest players in higher education in Brazil, in number of students, according to the latest INEP Census of Higher Education. The limited assurance is carried out by PwC and will have as its scope a sampling of indicators from the Global Reporting Initiative (GRI) to be listed in the GRI Content Summary created by the International Integrated Reporting Council (IIRC) and the CPC Guidance 09 – Integrated Reporting of the Brazilian Securities and Exchange Commission (CVM). of this document. To ensure the commitment to transparency and accountability to all stakeholders, for the 2023 fiscal year, the Integrated Report was prepared in accordance with the GRI Standards, and has the indicators of the Sustainability Accounting Standards Board (SASB), its content is correlated with the Sustainabile Development Goals (SDGs) of the United Nations (UN).

2. Organizational Boundaries and Exceptions in the Scope of the Report

The 2023 Integrated Report follows the limits concentrated on the operations of YDUQS Participações S.A. It addresses the strategic management, initiatives and results obtained by the company and its consolidated companies. In the approach to operational and socio-environmental performance, information from the entire company is consolidated.

ENTITIES INCLUDED IN THE ORGANIZATION'S SUSTAINABILITY REPORT:

• Yduqs Participações S.A.¹ Sociedade de Ensino Superior Estácio de Sá Ltda., Irep Sociedade de Ensino Superior, Médio e Fundamental Ltda., Sociedade Educacional Atual da Amazônia Ltda., Anec - Sociedade Natalense de Educação e Cultura Ltda., Sociedade Universitária de Excelência Educacional do Rio Grande do Norte Ltda., Nova Academia do Concurso - Cursos Preparatórios Ltda., Idez Empreendimentos Educacionais Ltda., Sociedade Educacional do Rio Grande do Sul Ltda.; Uniuol Gestão de Empreendimentos Educacionais e Participações Ltda., Unisaoluis Educacional Ltda., Instituto de Ensino Superior Social e Tecnológico Ltda., Assesc-Sociedade Educacional de Santa Catarina Ltda., Sociedade de Ensino Superior Estácio Ribeirão Preto Ltda., Sociedade de Ensino Superior Estácio Amazonas Ltda., Organização Paraense Educacional e de Empreendimentos Ltda., Centro de Ensino Unificado de Teresina Ltda., Centro Educacional Nossa Cidade Ltda., Faculdades Integradas de Castanhal Ltda., Fufs -Faculdade Unidas de Feira de Santana, Sociedade de Ensino Superior Unitoledo Ltda., Yduqs Educacional Ltda., Ydugs Participações 2 Ltda., Instituto de Ensino Superior da Amazônia Ltda., Sociedade Educacional Ideal Ltda., Damásio Educacional Ltda., Grupo Ibmec Educacional Ltda., Artec - Associação da Região Tocantina de Educação e Cultura Ltda., Abep -Academia Baiana de Ensino Pesquisa e Extensão Ltda., Sociedade de Educação do Vale do Ipojuca Ltda., Athenas Serviços Administrativos Ltda., Unijipa - União das Escolas Superiores

de Ji-Paraná Ltda., Pimenta Bueno Serviços Educacionais Ltda., Centro de Educação de Rolim de Moura Ltda., União Educacional Meta Ltda., Centro de Educação do Pantanal Ltda., QCX Serviços Educacionais Ltda ("Qconcursos") and Wemed Educação Médica S.A. ("Hardwork").

3. Accounting Information, Currencies, and Conversions

The accounting information published in the 2023 Integrated Report was compared by the organization with the information available in the Financial Statements for the same period, which was audited by an independent third party, also by PwC. The company's functional and presentation currency is the Real (R\$).

4. Reporting Systems |

The collection of information for the production of the report included interviews with the company's leaders and access to documents and materials produced throughout 2023. The indicator booklet contains consolidated information on the company. Quantitative data are collected annually and managed monthly by the operational areas through various information technology systems – such as SIA (Student Management System), Corporate SOC (Health and Safety) management system, Climas (ESG Integrated Information Management Software), ASHER (Risk Management) – which meet the specific needs of each type of information. and by records based on manual controls. To calculate and consolidate them within the same standard, a "Conecta" data collection system was used. Criteria and exceptions are described in this Preparation Basis and in the GRI Content Brief, where applicable.

5. Breakdown of reporting criteria

The table below aims to increase the detail on the criteria and assumptions adopted for measuring and consolidating the information, in accordance with the GRI indicators, which this report was built on and should be used as a complement to the reading of the 2023 Integrated Report of YDUQS Participações S.A., not only in its wording, but also in the GRI Indicators Booklet.

GRI Indicator/ Disclosure/ Content (Note: The GRI Standards published until December 2021 were considered)	Standard Name	Description of the Standard	Criterion breakdown	Criterion Breakdown Answer
2-1	Organizational Details	 a. report your legal name; b. report its corporate structure and legal form; c. report the location of its headquarters; d. report the countries in which it operates. 	N/A	N/A
2-2	Entities included in the organization's sustainability reporting	a. list all entities included in its sustainability report; if the organization has audited consolidated financial statements, or financial information recorded in a public record, specify the differences between the entities included in its financial reporting and the list of those included in its sustainability reporting; b. If your organization is made up of multiple entities, explain the approach used to Consolidate information, including: i. whether the approach involves adjustments of information for minority interests; how the approach considers mergers, acquisitions and divestitures of entities or parts of entities; Ii. whether and how the approach differs throughout the contents of this ISA and throughout the of material issues.	N/A	N/A
2-3	Reporting period, frequency and contact point	 a. specify the reporting period and frequency of its sustainability reporting; specify the reporting period of your financial report, and if it does not align with the period of your sustainability report, explain the reason for this; b. c. report the date of publication of the report or information reported; d. specify the contact for questions about the report or the information reported 	N/A	N/A
2-4	Restatements of information	report restatements of information made in previous reporting periods, and	N/A	N/A

			[
		Explain: i. the reasons for the reformulations; II. The Effect of Reformulations.		
2-5	External assurance	The organization shall: describe your policy and practice for obtaining external verification, including how and whether the highest governance body and senior executives are involved; the. Whether the organization's sustainability report has been externally verified: provide a link or reference to the external verification report(s), or verification statement(s); i. describe what has been verified and on what basis, including the standards of verification used, the level of verification obtained, as well as any limitations the verification process; Ii. describe the relationship between the organisation and the verification service provider External.	N/A	N/A
201-1(2016)	Direct economic value generated and distributed	The reporting organization shall report the following information:a. The direct economic value generated and distributed (EVG&D) on an accrual basis, including the basic components of the organization's global operations listed below. If the data is presented on a cash basis, please report the rationale for this decision and the following basic components:i. Direct economic value generated: revenues; ii. Distributed economic value: operating costs, employee salaries and benefits, payments to the government (by country), and investments in the community; iii. Economic value retained: "direct economic value generated" minus "economic value distributed".b. When significant, report the	Specify whether the DVA is being presented in accordance with the format provided for in the Financial Statements and in CPC 09 - Statement of Value Added (DVA). If applicable, list which companies are included in the DVA.	DVA presented in the format provided for in DFd and CPC 09

205-3(2016)	Confirmed incidents of corruption and actions taken	The reporting organization shall report the following information:a. Total number and nature of confirmed cases of corruption.b. Total number of confirmed cases in which employees were fired or punished for corruption.c. Total number of confirmed cases in which contracts with business partners were terminated or not renewed as a result of corruption-related violations.d. Corruption- related lawsuits filed against the organization or its employees in the reporting period and the outcome of those lawsuits.	one. Definition of the concepts adopted by the organization for: "confirmed cases" and "corruption".b. and d. Definition of the concept adopted by the organization for "employees" (professional categories contained or not in this concept, e.g. interns, apprentices, directors, officers, etc.).	 "corruption": Regarding the concept of Corruption, based on our Anti- Corruption Code: "1. The act or effect of bribing* one or more persons in one's own cause or that of another, Corruption can be configured in two ways: Active Corruption – The act of offering or promising an undue advantage to a public or private official, to determine him to perform, omit or delay an official act. Passive corruption – The act of soliciting or receiving, for oneself or for others, directly or indirectly, even if it is the function or before, of assuming it, but because of it, an undue advantage, or accepts the promise of such an advantage" "confirmed cases": We consider as confirmed cases, valid reports that have undergone the following analysis: the complaint is formalized (registered) in our Confidential Channel, whether it is corruption or any other typology listed in the system options, we start the investigation of the alleged facts and the evidence attached to the report, when necessary we collect other information and/or evidence from specialized areas of the Company such as Audit or Anti- Fraud Team, in addition to

				exploratory and confirmatory interviews of those involved. In possession of sufficient evidence to prove the infraction committed, we consult the disciplinary measures policy for the application of the appropriate measure to the case. The Company takes measures and has mechanisms to detect and deal with cases of corruption through risk management, internal policies, anti-corruption code, training, whistleblowing channel and disciplinary action policies. The indicators related to corruption risks are monitored by Direx in the Risk Committee. The organization considers the following employees: Vice Presidency; Board of directors; Management; Coordination; Expert; Supervision; Administrative; Support; Teachers; Interns; Apprentices.
206-1(2016)	Legal actions for anti-competitive behavior, anti-trust, and monopoly practices	The reporting organization shall report the following information:a. Number of lawsuits pending or closed during the reporting period relating to unfair competition and violations of antitrust and antitrust laws in which the organization has been identified as a participant. Key results of completed lawsuits, including any decisions or judgments.	one. Describe what made up the basis of lawsuits regarding unfair competition and violations of antitrust and antitrust laws used by the organization (e.g., categories filtered in internal search systems).b. Describe what are considered to be "key results".	N/A
2-9 (2021)	Governance structure and composition	describe its governance structure, including the committees of the highest body of governance; the. list the committees of the highest governance body that are responsible for making and the supervision of the management of the organization's impacts on the economy, the environment and people; b. Describe the composition of the highest governance body and its committees by: i. executive or non-executive function; ii. independence; iii. term of office of the members of the highest governance body; number of other important positions and commitments of each member, as well as	N/A	N/A

		monetary sanctions have been		
		applied;		
		the.		

			[1
		Report the total number and monetary amount of fines for cases of non-compliance with laws and regulations that occurred during the reporting period, discriminating This total by: fines for cases of non- compliance with laws and regulations that have occurred during the current reporting period; i. fines for cases of non- compliance with laws and regulations that have been paid during previous reporting periods; Ii.		
		 b. c. describe significant cases of non-compliance; d. describe how it has defined significant cases of non- compliance 		
2-28 (2021)	Membership associations	The organization shall: report to industry associations, other associations, and national organizations or international advocacy groups in which it participates.	N/A	N/A
2-29 (2021)	Approach to stakeholder engagement	The organization shall: describe the approach taken to engage with stakeholders, including: the categories of stakeholders it engages with and how they are identified; i. ii. the purpose of stakeholder engagement; how the organization seeks to ensure meaningful engagement with stakeholders.	N/A	N/A
2-30(2021)	Collective bargaining agreements	The organization shall: a. report the percentage of total employees covered by collective bargaining agreements; b) For employees not covered by collective bargaining agreements, state whether the organization determines its working conditions and terms of employment on the basis of collective bargaining agreements covering its other employees or on the basis of collective bargaining agreements of other organizations.	one. Define what is being counted as "employees" (professional categories that may or may not be included in this concept, e.g., interns, apprentices, board members, officers, etc.)	N/A

2-6(2021)	Activities, value chain and other business relationships	The organization must:a. inform the sector(s) in which it operates; b) describe its value chain, including:i. the activities, products, services and markets served by the organization; ii. the organization's supply chain; iii. the organization's downstream entities and their activities; c. report other relevant business relationships; d. describe significant changes in 2-6-A, 2-6-B, and 2-6-C compared to the previous reporting period.	c. Report the concept adopted by the organization for "relevant business relationships".d. Specify the criteria adopted by the organization for the definition of "significant changes".	c. The concept adopted by the organization for "relevant business relationships" is aligned with companies in which we hold more than 51% control. YDUQS consolidates all entities over which it has control, i.e., when it is exposed to or has rights to variable returns from its involvement with the investee and has the capacity to direct the relevant activities of the investee. The criterion adopted by the organization for the definition of significant changes is: New acquisitions; New units, closure of activities, expansions; Changes in the company's operational structure.
2-7(2021)	Employees	The organization shall: a.report the total number of employees, and a breakdown of this total by gender and by region; b) report the total number of: i. permanent employees and the breakdown by gender and region; ii. temporary employees, broken down by gender and region; iii. non- guaranteed hours and discrimination by gender and region; iv. full-time employees and a breakdown by gender and by region;v. part-time workers, and a breakdown by gender and by region; (c) describe the methodologies and assumptions used to compile the data, including whether the figures are reported: i. in terms of staff, full-time equivalent (FTE) or using another methodology; ii.at end of the reporting period, either as an average over the reporting period, or using another methodology; c) report contextual information necessary to understand the data reported in 2-7-ae 2-7-b; d) describe significant fluctuations in the number of employees during the reporting period and between the reporting periods.	Concepts to be detailed by the organization: - "employees" (professional categories contained or not in this concept, e.g., interns, apprentices, directors, officers, etc.) - "permanent employees"- "temporary employees"- "temporary employees"- "full- time"- "part-time"- "significant fluctuations" Note: Observe the assumptions to be reported in response to letters "c" and "d" of the indicator requirements.	 In indicator 2-7, we conducted openings by region of operation of the company and by gender (Men/Women). The organization considers as "employees": Vice Presidency, Board of Directors, Management, Coordination, Supervision, Administrative, Specialist, Support, Teacher, Trainee, Apprentices. Permanent Employees: CLT contract, no contract time. Temporary employees: CLT contract, with a fixed contract period. The organization considers "non-employees": interns and resident physicians. The organization understands it as full-time: 180/220 hours. And consider as part-time: Different from 180/220 hours. We consider "significant fluctuations" to be the drastic increase or decrease in the number of employees for periods. *We count assets by CPF, not counting Interns and Resident Doctors. "non-guaranteed hours employees" means trainees and resident physicians
2-8(2021)	Workers who are not employees	The organisation shall: a.report the total number of workers who are not employed and whose work is controlled by the organization and describe: i.the most common types of	Concept to be detailed by the organization: - "significant fluctuations"	We consider significant fluctuations to be the drastic increase or decrease in the number of employees for periods. When the differences are greater than or equal to 40%.

the reporting organization Connect).	
shall:2.1.1 Avoid double-	
counting of fuel consumption	
when reporting self-generated	
energy consumption. If the	
organization generates	
electricity from non- renewable or renewable fuel	
sources and then consumes	
the generated electricity, the	
energy consumption shall be	
counted only once within the	
fuel consumption; 2.1.2 report	
fuel consumption, 2112 report	
by non-renewable and	
renewable fuel sources; 2.1.3	
report only the energy	
consumed by entities owned	
or controlled by the	
organization; 2.1.4 calculate	
the total energy consumption	
within the organization, in	
joules or its multiples, by	
applying the following	
formula:(SEE FORMULA IN	
THE STANDARD)	
The reporting organization	
shall report the following	
information:	
the. Energy intensity rate for	
the organization.	
b. Organization-specific	
metric (the denominator)	
302-3 (2016) Energy intensity chosen to calculate this rate.	
c. Types of energy included in the intensity rate; whether	
fuel, electricity, heating, cooling, steam, or all.	
d. Whether the rate uses	
energy consumed within the	
organization, outside of it, or	
both.	

		The reporting organization shall report the following information:a. Volume of reductions in energy consumption achieved directly as a result of improvements in conservation and efficiency, in joules or multiples thereof.b. Types of energy included in the reductions: whether fuel, electricity, heating, cooling,		
302-4(2016)	Reduction of energy consumption	steam, or all. The basis used for the calculation of energy consumption reductions, such as a base year or baseline, including the rationale for their choice.d. Standards, methodologies, assumptions and/or calculation tools adopted.2.7 When compiling the information specified in Content 302-4, the reporting organization shall:2.7.1 exclude reductions resulting from reduced production capacity or outsourcing activities; 2.7.2 Describe whether the energy reduction is estimated, modelled or from direct measurements. If an estimate or modeling is used, the organization should	As presented in letter "d" of the content that must be reported in response to the indicator: "Standards, methodologies, assumptions and/or calculation tools adopted."	It does not apply, as there are no mechanisms in place to measure the reductions in energy consumption obtained directly as a result of improvements in conservation and efficiency.
303-2 (2016)	Management of water discharge related impacts	report the methods used. The reporting organization shall report the following information: the. A description of the minimum standards set for the quality of wastewater discharge, and how these minimum standards were determined, including: I. How Standards Have Been Determined for Facilities Operating in Locations Without requirements for disposal; ii. any internally developed water quality standards or guidelines; iii. any sectoral standards considered; IV. whether the profile of the water body receiving the discharge has been considered.	N/A	N/A
303-3(2018)	Water withdrawal	The reporting organization shall report the following information:a. Total water abstraction in all areas in megaliters, broken down by the following sources, if applicable:i. Surface water;	b. Inform what is the criterion used by the company in its understanding of what are "water-stressed areas".	We consider as water stress areas the units that are supplied exclusively by artesian wells. We use the dissolved solids criterion only to determine whether the water we purchase is fresh or salty. Or during a physicochemical analysis

305-4 (2016)	GHG emissions intensity	"The reporting organization shall report the following information: the. GHG emissions intensity index for the organization. b. Specific metric (the denominator) chosen by the organization to calculate this ratio. c. Types of GHG emissions included in the intensity index; whether direct (Scope 1), indirect (Scope 2) from energy procurement and/or other indirect emissions (Scope 3). d. Gases included in the calculation; whether CO2, CH4, N2O, HFCs, PFCs, SF6, NF3 or all. 2.7 In compiling the information specified in Content 305-4, the reporting organization shall: 2.7.1 calculate the index by dividing the absolute GHG emissions (the numerator) by the metric organization-specific (the denominator); 2.7.2 if you choose to report an intensity index for other indirect (Scope 3) emissions of GHG, report this intensity index separately from the GHG intensity indices.		
305-5(2016)	Reduction of GHG emissions	GHG intensity indices. direct (Scope 1) and indirect (Scope 2) emissions from energy procurement." The reporting organization shall report the following information:a. Reduction of GHG emissions as a direct result of reduction initiatives, in metric tons of CO2 equivalent. Gases included in the calculation: whether CO2, CH4, N2O, HFCs, PFCs, SF6, NF3 or all.c. Base year or baseline, including the rationale for your choice. Scopes in which the reductions occurred: whether direct (Scope 1), indirect (Scope 2) emissions from energy purchases and/or other indirect (Scope 3) emissions. Standards, methodologies, assumptions and/or calculation tools adopted.2.9 When compiling the information specified in Content 305-5, the reporting	As presented in letter "e" of the content that must be reported in response to the indicator: "Standards, methodologies, assumptions and/or calculation tools adopted." 2.9.3. Define the concepts of "associated primary effects" and "significant side effects".	The methodology used to account for the data was carried out through direct measurements. As for the references adopted, we use: • NBR ISO 14064 standard; Brazilian Association of Technical Standards, 2007 (ABNT, 2007); • Specifications of the Brazilian GHG Protocol Program; Verification Specifications of the Brazilian GHG Protocol Program; GHG Corporate Protocol - Brazilian GHG Protocol Program (PBGHGP) - Fundação Getúlio Vargas; World Resources Institute (FGV/GVces; WRI, 20 - Associated primary effects are activities or elements designed to reduce GHG emissions.

	1	1	1	1
		organization shall:2.9.1 exclude reductions resulting from reduced production capacity or outsourcing; 2.9.2 use the inventory or project method to account for reductions; 2.9.3 calculate the total GHG emission reductions of an initiative by the sum of their associated primary effects and any significant secondary effects; 2.9.4 if reporting two or more types of Scope, indicate separately the reductions for each; 2.9.5 Report separately reductions from offsets.		- Significant side-effects are unintended and minor consequences of a reduction initiative, including changes in operations, that result in changes in GHG emissions elsewhere.
306-1(2020)	Waste generation and significant waste-related impacts	The reporting organization shall report the following information:a. For the significant – actual and potential – impacts related to waste, a description of:i. inputs, activities and outputs that cause or could cause such impacts; ii. whether these impacts are related to waste generated in the organization's own activities or to waste generated upstream or downstream in its value chain.	A. Concept adopted by the organization for "significant impacts – actual and potential".	The concept adopted by the organization for "significant impacts – actual and potential" is: The operational unit acquires chemicals licensed by the federal police. These products are stored, and later fractionated for academic practices in the laboratories. The handling of these chemicals during the academic practical classes generate the residues (chemical reagents) that are stored in drums until the temporary waste shelter. There are also academic laboratory practices that generate infectious waste (gases and cotton with biological materials) and sharps (glassware and syringes). The handling and segregation of this waste takes place through milky white bags and cardboard boxes (descarpack), respectively. There is a possible impact if waste management practices are not carried out properly. In this way, it can generate the exposure of the infective material with the proliferation of viruses and bacteria that cause possible diseases. Depending on the extent, they can compromise soil and water bodies. There is also the indirect impact (downstream), caused during the collection, transportation and final disposal of waste by a contracted supplier and qualified (with valid legal documentation) for the service. For water, we consider as criteria the volume of water consumed, the volume of water consumed, the volume of water extracted from wells, the alternatives of water supply, and the possibility of water

			l .	
				scarcity. For the waste generated, we use as a criterion the type of waste generated, the volume of
				generation, the form of storage, the
				provision of collection, transportation and final disposal by
				a qualified company. These
				variables help us determine the
				actual and potential risks in the day- to-day operation. The practices
				established and informed in the
				interview, as well as the Waste
				Management PGE and the Environmental Requirements PGE
				help us to establish the minimum
				necessary for the proper functioning
				of the units, thus minimizing the
				actual and potential risks arising from our activity.
				For the waste generated, we use as a
				criterion the type of waste
				generated, the volume of generation, the form of storage, the provision of
				collection, transportation and final
				disposal by a qualified company. These variables help us determine
				the actual and potential risks in the
				day-to-day operation.
				Our economic activity is focused on

				addressing the program, practices,
				and awareness of those involved.
				We have waste collection contracts,
				including suppliers able to carry out
				the transport, treatment and environmentally appropriate
				disposal. This includes recycling
				and reverse manufacturing
				processes for the waste generated by

				the company. These suppliers undergo documentary validation by the environmental area to verify that they have the appropriate licenses for the type of treatment contracted. We have implemented PGE 01.043, which deals with Waste Management within the units, which establishes guidelines for execution and control, reinforcing awareness about the hierarchy of waste,
306-3(2020)	Waste generated	The reporting organization shall report the following information:a. Total weight of waste generated in metric tons and a breakdown of that total by waste composition.b. Contextual information needed to understand the data and how the data was compiled.2.1 When compiling the information specified in Content 306-3-a, the reporting organization shall:2.1.1 exclude effluents, unless required by national law that they be reported within the total waste; 2.1.2 Use 1000 kilograms as a measurement for one metric ton.	As presented in letter "b" of the content that must be reported in response to the indicator: "Contextual information necessary to understand the data and how the data was compiled."	starting with non-generation. The Environment area has a procedure on Waste Management (PGE 01.043 and its annexes) implemented and disclosed to all the company's operating units. This PGE establishes requirements and practices to be adopted by the operational units, and addresses, among them, the issuance of the waste transport manifest (MTR). It is worth noting that the PGE is updated annually. In this sense, the environmental area carries out the quarterly consultation on the websites of the environmental agencies to identify if the MTR are being issued properly, and to confirm if the collection service provider made the receipt within the deadline, resulting in the Final Destination Certificate (CDF). It is based on these CDFs that we monitor the amount of waste generated by the units. If the supplier has not acknowledged receipt of the waste, we contact the supplier to understand the reason and resolve any pending issues that may occur. Depending on the occurrence, we hold realignment meetings with the supplier or even refresher training for the operating units.
306-4(2020)	Waste diverted from disposal	The reporting organisation shall report the following information:a. total weight in metric tonnes of waste not intended for disposal and a breakdown of this total by waste composition.b. Total weight in metric tonnes of hazardous waste not destined for disposal and a breakdown of this total by the following recovery operations:i. Preparation for reuse; ii. Recycling;	As presented in letter "e" of the content that must be reported in response to the indicator: "Contextual information needed to understand the data and how the data was compiled."	The Environment area has a procedure on Waste Management (PGE 01.043 and its annexes) implemented and disclosed to all the company's operating units. 403-9(2018)	Work-related injuries	assumptions adopted. The reporting organization shall report the following	organization's concept	

	1			
		calculation of the number and rate of occupational accidents with serious consequences; 2.1.2 include deaths resulting from accidents at work in the calculation of the number and index of accidents at work that are mandatory to report; 2.1.3 include accidents resulting from commuting incidents of workers only when transportation has been provided by the organization; 2.1.4 Calculate the key figures on the basis of 200,000 or 1,000,000 hours worked, using the following formulas:(SEE FORMULAS IN THE STANDARD)		
404-1(2016)	Average hours of training per year per employee	The reporting organization shall report the following information:a. Average hours of training performed by the organization's employees during the period covered by the report, broken down by:i. gender; II. Functional Category.	Specify: - Does the average hours refer to the average per employee? - What types of activities were considered training and how were hours measured/calculated?- Concept adopted by the organization for "employees" (professional categories contained or not in this concept, e.g., interns, apprentices, board members, officers, etc.) Detailing how the functional categories were stratified.	The 404-1 indicator is calculated based on the training hours controlled by Educare Average hours per employee- Any course offered by YDUQS consumed by employees (CPF)- The organization considers as "employees": Vice Presidency, Board of Directors, Management, Coordination, Supervision, Administrative, Specialist, Support, Teacher, Trainee, Apprentices. "Non- employees": Interns and Resident Physicians
404-2 (2016)	Programs for upgrading employee skills and transition assistance programs	The reporting organization shall report the following information: the. Type and scope of programs implemented and assistance provided to improve the employee skills. b. Career Transition Assistance Programs Offered to Facilitate Employability and end-of-career management due to retirement or termination of the employment contract. work.	N/A	N/A
404-3(2016)	Percentage of employees receiving regular performance and career development reviews	The reporting organization shall report the following information:a. Percentage of total employees, broken down by gender and employee category, who received regular performance and career development	Specify: - Concept adopted by the organization for "employees" (professional categories included or not included in this concept, e.g., interns, apprentices, directors,	 Average hours per employee- Any course offered by YDUQS consumed by employees (CPF)- The organization considers as "employees": Vice Presidency, Board of Directors, Management, Coordination, Supervision, Administrative, Specialist, Support, Teacher, Trainee, Apprentices.

			27	
		evaluations during the period	officers, etc.)	"Non-employees": Interns and
		covered by the report.	Detailing how the	Resident Physicians - Employees of
			functional categories	all integrated units are counted, with
			were stratified What	the exception of non-integrated
			types of activities were	units, over which Yduqs does not
			considered "regular	have management (Hardwork and
			performance and career	Qconcursos). The individual goals
			development	assigned to each employee. From
			appraisals"?	this cycle onwards, we changed the
				assumptions of discrimination by
				functional category. The change of
				functional category classification is
				a matter of transparency with the
				market. The new categorizations
				were more appropriate to the reality
				of YDUQS positions, the groupings
				were more aligned with internal
				practices. For corporate employees,
				the indicator includes the
				evaluations of all those hired until
				October/2023, as there is a period of
				3 months for new hires to be hired.
				Thus, those admitted between
				Oct/2023 and Dec/2023 had not yet been evaluated on 12/31/2023. In
				addition, for professors and course coordinators, the evaluation is after
				the end of the semester. Therefore,
				the employees evaluated in 2023 are
				those who worked in the academic
				semester of $02/2023$ and $01/2024$.
				This criterion in relation to the
				period causes some fluctuations to
				occur in the base of active
				employees from one period to the
				next, that is, employees who have
				left and new employees who have
				been hired. So, because the
				evaluation cycle has this cut, the
				cycle that starts in October and goes
				through December - evaluation
				cycle - someone who was evaluated
				in October may have left the
				company in December, so that there
				were 1200 analyst people and all
				evaluated in October, in December
				there will be 1199 analysts in the
				active employee base. Therefore,
				when calculating the percentage of
				evaluated, it can be higher than
				100% (1200/1199). The categories
				of resident physicians, interns and
				apprentices are not considered, as
				they are not included in the standard
				evaluation cycle
		The reporting organization	Specify: - Concept	- Average hours per employee- Any
		shall report the following	adopted by the	course offered by YDUQS
	D	information:a. Percentage of	organization for	consumed by employees (CPF)- The
107 1 (201 0)	Diversity in	individuals who are members	"employees"	organization considers as

SV-ED-230a.3(2023)	(1) Number of data breaches, (2) percentage involving personally identifiable information (PII), (3) number of students affected Note SV-ED-230a.3 – Disclosure should include a description of corrective actions implemented in response to data breaches.	 1 An entity shall calculate and disclose (1) the total number of data breaches identified during the reporting period.1.1 A data breach is defined as the unauthorized movement or disclosure of confidential information to a party, usually outside the organization, that is not authorized to have or see the information. This definition is derived from the glossary of the U.S. National Initiative for Cybersecurity Careers and Studies (NICCS).1.2 The scope of disclosure is limited to data breaches that resulted in a deviation from the entity's expected results in terms of confidentiality and/or integrity. 2.1 The entity shall disclose (2) the percentage of data breaches in which personally identifiable information (PII) was subject to the data breach.2.1 PII is defined as any information about an individual maintained by an entity, including (1) any information that can be used to distinguish or trace an individual's identity, such as name, Social Security Number (SSN), date and place of birth, mother's maiden name, or biometric records; and (2) any other information that is linked or may be linked to an individual, such as medical, educational, financial, and employment information. This definition is derived from the U.S. Government Accountability Office Report to Congressional Requesters, There Are Alternatives to Improve the Protection of Personally Identifiable Information.2.2 The scope of disclosure will include incidents where encrypted data was acquired with an encryption key that was also acquired, as well as if there is a reasonable belief that the encrypted data could easily be converted to plain text.2.2.1 Encryption is defined as the process of transforming plaintext into ciphertext. This definition is derived from the NICCS glossary.2.3 The scope of disclosure is limited to infractions where students have been notified of the infraction, either by legal requirement or voluntarily by the entity 	The database of discrimination cases used by the organization in 2023 contains reports that bring in their content the theme "discrimination". Adopted concepts are those that are configured in violation of human rights, corruption, correct processing of personal data. I. Complaints received from external parties and proven by the organization: 353 (this is the volume of requests from data subjects, in the channel dedicated to this)

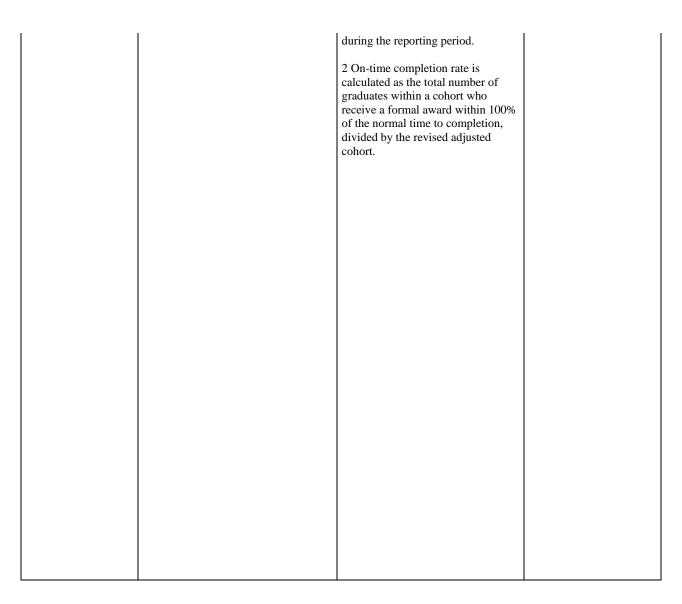

personal data has been compromised
in a data breach.3.1 Accounts that

4 An entity may delay disclosure if a
law enforcement agency determines
that notification precludes a criminal
investigation or until the law
enforcement agency determines that
such notification does not jeopardize
the investigation.
Note SV-ED-230a.31 An entity
shall describe corrective actions
taken in response to data breaches,
such as changes in operations,
management, processes, products,
business partners, training, or
technology.1.1 The U.S. SEC
Commission Statement and
Guidance on Public Company
Cybersecurity Disclosures may
provide additional guidance on
disclosures on corrective actions
taken in response to data breaches.2
All disclosure should be sufficient to
be specific to the risks the entity
faces, but the disclosure itself will
not compromise the entity's ability
to maintain data privacy and
security.3 The entity may disclose
its data breach disclosure policy to
affected students in a timely manner.

SV-ED-260a.1(2023)	Graduation Rate	1 The entity will calculate the graduation rate, consistent with the methodology described in the U.S. Right to Know and Campus Safety Act (P.L. 101-542), passed by the U.S. Congress on November 9, 1990, as the percentage of graduates in the adjusted review cohort who receive a formal award within 150% of the normal time to completion.1.1 Graduates are defined as students who are awarded a degree, diploma, certificate, or other formal award.1.2 Normal time to completion is defined by the U.S. Integrated Postsecondary Education Data System (IPEDS) as the amount of time required for a student to complete all requirements for a degree or certificate according to the institution's catalog. Typically, it is four years (eight semesters or quarters, or 12 quarters, excluding summer terms) for a bachelor's degree at a standard-term institution; two years (four semesters or quarters, or six quarters, excluding summer terms) for an associate's degree at a standard-term-based institution; and the various scheduled times for certificate programs.1.3 The cohort is defined according to the entity's reports in accordance with the U.S. Student Campus Right to Know and Safety Act. If the entity does not report under this law, then the cohort is defined as the collective group of students entering a particular program at the same time.1.4 The revised cohort is defined as the initial cohort after the revisions are made. Cohorts may be revised if an institution discovers that incorrect data has been reported in a previous year.1.5 Adjusted cohort is defined as the result of removing any allowable exclusions from a cohort (or subcohort). For the Graduation Rate component under the Student Right to Know Act and the U.S. Campus Safety Act.1.5.1 "Exclusions are defined as those students who can be removed (excluded) of a cohort (or subcohort). For the Graduation Rates report, students may be removed from a cohort if they leave the institution for one of the following reasons: death or total and permanent disability; service in tederal	Census of Hig Education, MI
